

Case Study: A New Payment System

Founded in 2021, the “Simple Finance” is one of the fastest online wealth management companies focused on making investments and savings easier for everyone. After detailed analysis, the executive board approved the strategic program to move to a new payment processing system. The payment processing system is the backbone of the organization, and it is critical for their earnings to process transaction promptly.

You are part of the project leadership team responsible for the planning and execution of this strategic program. Your first assignment is to **propose the project life cycle** to the executive board.

[You have a choice to use any approach (predictive, iterative, incremental, agile, and hybrid).]

In your answer, include:

- a) Your choice of the project life cycle, and explain your choice.
- b) Different phases that the project will go through, with a brief explanation of each.
- c) Flowchart to show the lifecycle you have selected.
