

BRAC University
Department of Electrical and Electronic Engineering
BSRM School of Engineering
EEE359: Engineering Project Management

Mid-Project

Instructions:

Research:

- Conduct preliminary research to understand the project's requirements, potential challenges, and stakeholder expectations.
- You need to interview potential stakeholders (at least one person from the BSRM School of Engineering) to gather insights and requirements.

Prepare the Project Initiation Document (PID), also known as the Project Charter:

Your PID should include the following sections:

- **Project Title:** A concise name that identifies the project.
- **Project Background/Purpose:** Explain why this project is being undertaken, its significance, and its expected benefits.
- **Objectives:** List the specific goals that the project aims to achieve. Make sure these are measurable and time-bound.
- **Scope:** Define what will be included in the project and, equally importantly, what will be excluded.
- **Stakeholder Analysis:** Identify the project's key stakeholders and describe their roles and interests. Include stakeholder analysis tools.
- **Resources:** Things that are needed to complete the project.
- **Benefits and Dis-benefits:** Expected benefits and dis-benefits from the project.
- **Key Deliverables:** The outputs that will be submitted during the project. These can be tangible or intangible.
- **Project Team Members:** List the project team members and their responsibilities.
- **Project Timeline:** Outline the major milestones or phases of the project, including estimated dates or durations for each.
- **Estimated Budget:** Provide an estimated budget detailing major cost items. Mention the cost estimation method you used.
- **Key Risks:** Identify potential risks to the project and propose mitigation strategies.
- **Approval:** Include a section for signatures from the project team members and critical stakeholders indicating their acceptance of the charter (you need at least one signature from a faculty member from the BSRM School of Engineering as a stakeholder).

Formatting and Submission:

- Your Project Initiation Document should NOT be more than 10 pages long, excluding title and approval pages, clearly written (digitally), and well-organized.
- Use headings, bullet points, and tables where appropriate for clarity.
- Cite any sources of information or data used in your research.

Evaluation Criteria:

Criteria	Details	Marks
Comprehensiveness	How well does the PID cover the required sections and details?	5
Clarity and Coherence	Is the PID clearly written and logically organized?	5
Feasibility and Realism	Are the project plans and objectives realistic and achievable?	5
Creativity and Originality	Demonstrate creativity in project approach.	5
Research and Accuracy	Quality of research and accuracy of the information provided.	5

Due Date: 20th August, 2026.

Submission:

- hard-copy: in class.
- soft-copy: in Google Classroom.

Presentation: 22th August, 2026.

- 10-minutes per group.
